1. [REDACTED] troops were entrained at Altenburg, Halle, and Altenradow for dispatch to the Gerdorf area about 10 October 1953. After 16 October, the volume of Soviet troop movements connected with the return of units to their winter quarters increased to such an extent that non-military traffic was seriously affected. Major detraining operations took place in Halle and Merseburg after 17 October. Rail shipments to the Magdeburg area were also continuously observed. It appears that these troop movements have been completed in the meantime, because the trains involved in these operations are being disassembled. 25X1
2. [REDACTED] a shunter of Gera railroad station who was detached to Grossschwabhausen on 12 October, that Soviet troops were continuously detrained near Grossschwabhausen for three days. Temporary ramps and other loading facilities had been built along the line. The shunter also stated that local farmers had been ordered to harvest their fields prior to 12 October because of maneuvers to be held in this area. 2 25X1

1. [] Comment. Already about 10 October, [] unidentified artillery units of the Eighth Gds Army from Altenburg, component units of the 21st Gds Mecz Div from Halle, and major elements of the IV Arty Corps, and the 43d Gds Army Arty Brig of the Eighth Gds Army from Halle were proceeding to the area in which the fall maneuvers of the Eighth Gds Army were held. Corresponding observations confirming this information have been reported in the mean time. Reports have also been received to the effect that component units of the 21st Gds Mecz Div and of the IV Arty Corps returned from the maneuver area of the Eighth Gds Army to Halle on the one hand, and to Potsdam, Altengradow, and Rathenow on the other. The unidentified engineer regiment of the GOFG moved from the Ohrdruf-Erfurt area to Bernburg on 14 and 15 October. The movements of units from Merseburg about 10 October were reported for the first time. This indicates

that the 76th Arty Brig (US), after returning to its military posts on 7 October, again left Merseburg to participate in the fall maneuvers of the army.

25X1

2. [] The area near Grossschwabhausen was also reported by other sources as one of the detraining points used by the Eighth Gds Army in connection with its fall maneuvers.

3. [] Comment. Most of these trains were probably used for the rotation of personnel between East Germany and the USSR, which was started in mid-October. The train observed on 20 October leaving Jueterbog is believed to be identical with shuttle train [] while the train which reportedly left Kuestrin on 21 October, is probably identical []

25X1

[] See also paragraph 6 of the present report. The other trains mentioned cannot be evaluated because no shuttle train [] were given.

25X1

4. [] Comment. These movements were connected with the return of major elements of the IV Arty Corps from Thuringia to Rathenow. The trains [] were reported for the first time. The trains which were observed carrying weapons were loaded with component units of the 65th Mort Brig (US) and of the 25th RL Brig. According to information available, a total of 14 troop tra

[] were dispatched from Thuringia to Rathenow between 17 and 19 October.

25X1

5. [] Comment. All the shuttle trains [] were reported for the first time. The information contained in this paragraph proves that the movement of recruits from the USSR to East Germany has been started. The troop cars mentioned in paragraph 7 of the present report carried discharges to assembly points.

25X1

6. [] Comment. A signal unit of the 3rd Gds Mecz Army presumably also participated in the fall maneuvers of the Eighth Gds Army.
